VoiceDesk

Phase 1 — key screens

A voice bot asks three short questions, extracts the requested service, company name and contact preference, and prepares a Bitrix24 lead. This is an interactive presentation prototype: guided answers, extraction and the CRM result are all simulated.

01 /demo

Demo Studio — conversation in progress

The bot asks three short questions. Each answer appears in the transcript while the captured details fill in on the right. Simulation mode is always clearly marked.

Phase 1 · Sample data

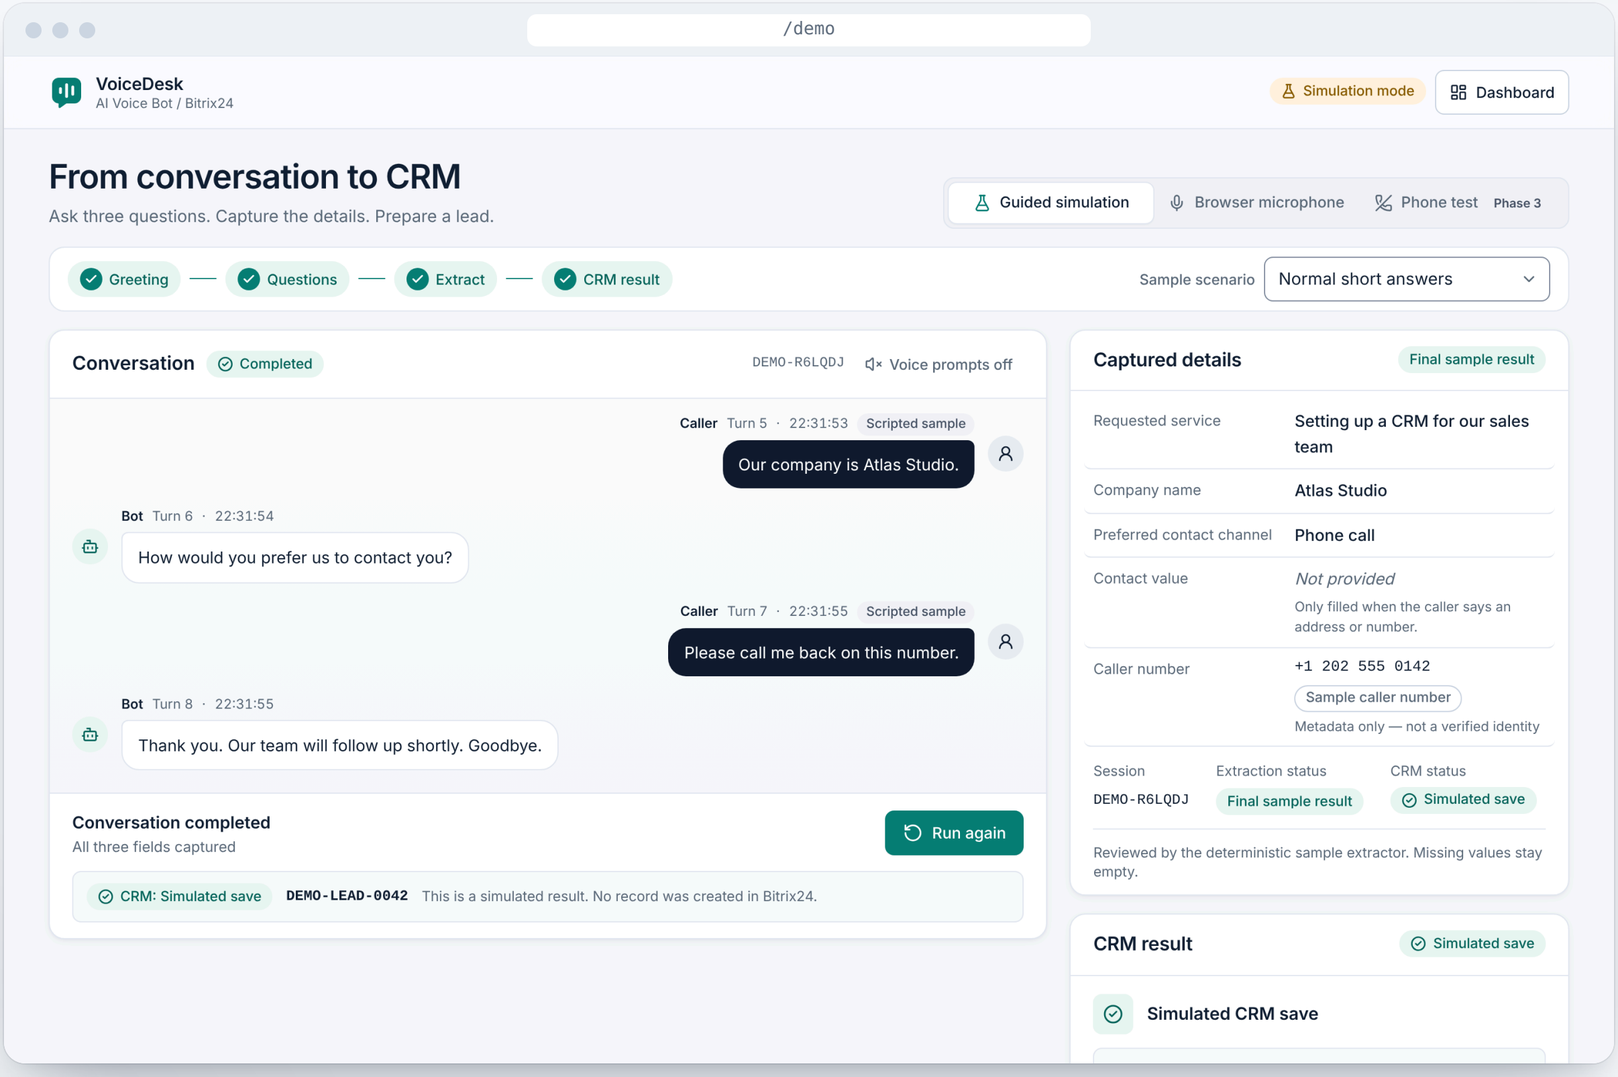

02 /demo

Demo Studio — final result

After the last answer the details are finalised and a CRM result appears with a synthetic ID.
The result is simulated: no record is created in Bitrix24 in this phase.
